

Commonly used Selenium Commands

Commonly used Selenium Commands

[open](#)

opens a page using a URL. For eg: open <http://www.wikipedia.org>

[click/clickAndWait](#)

performs a click operation, and optionally waits for a new page to load.

[verifyTitle/assertTitle](#)

verifies/asserts an expected page title.

[verifyTextPresent](#)

verifies expected text is somewhere on the page.

[verifyElementPresent](#)

verifies an expected UI element, as defined by its HTML tag, is present on the page.

[verifyText](#)

verifies expected text and its corresponding HTML tag are present on the page.

[verifyTable](#)

verifies a table's expected contents.

[waitForPageToLoad](#)

pauses execution until an expected new page loads. Called automatically when `clickAndWait` is used.

[waitForElementPresent](#)

pauses execution until an expected UI element, as defined by its HTML tag, is present on the page.

captureEntirePageScreenshotAndWait

Captures screenshot for entire page and saves it with the file name to the destination specified in the Target window

For eg: D:\Screenshots\Image01.jpg
